

## **Enrichir le dictionnaire électronique du grec moderne: Le cas des verbes préfixés par *καλο-* et *ψιλο-***

Eva Fista<sup>1</sup>

Université Aristote de Thessalonique, Grèce

### **Abstract**

In this article, we describe the results of a systematic study of the prefixes *καλο*, *ψιλο*- when used with simple verbs of Modern Greek. In this study we have enriched in a semi-automatic way the DELAGR (Electronic Dictionary of simple Greek words) and the DELAFGR (Electronic Dictionary of conjugated forms of Greek). The article presents a number of remarks on the construction of the verbs composed of a simple verb with a prefix and it discusses their inflection. Their syntactic and semantic description through a systematic study of the verbs included in the Greek Lexicon-Grammar will complete this research. Such analysis is ongoing.

**Keywords:** Prefixation, electronic dictionary, verbal inflection.
